

**Soils 201**  
**Study Outline – Soil Erosion**

*We just briefly touched on this topic – so the outline is pretty brief.*

- I. Water erosion
  - a. What are the different types of water erosion?
  - b. What is RULSE?
  - c. Know the factors in RUSLE, and know how to use them
  - d. What is Erosion Tolerance (T) – definition and standard value
  
- II. Combating water erosion
  - a. Which of the RUSLE factors can be managed by humans, and which are pretty much set?
  - b. What are some of the key practices that can be used to decrease water erosion?
  
- III. Wind erosion
  - a. How is wind erosion calculated (know the equation, and the terms – won't have to use!)
  - b. What are two practices that can be used to decrease wind erosion?
